REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the cited prior art fails to disclose or reasonably suggest generating a laser beam, illuminating a photoceram to convert the photo ceram into an amorphous exposed material, heating the amorphous material to form crystallized material, dissolving the crystallized material in combination with focusing the laser beam into a beam waist at a focal depth into the photoceram as recited in claims 1, 4 and 13.

The cited prior art disclose the claimed steps of generating a laser beam, illuminating a photoceram to convert the photo ceram into an amorphous exposed material, heating the amorphous material to form crystallized material, and dissolving the crystallized material, but fail to disclose or reasonably suggest focusing the laser beam into a beam waist at a focal depth into the photoceram.

The laser beam of the cited prior art focuses the laser beam by providing a shadowmask that provides the desired laser exposure onto the photoceram. Hence, a step of focusing a laser beam into a beam waist at a focal depth into the photoceram is not recited or reasonably disclosed in the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
